SUMMARY

BCA (Honours) student with strong skills in C#, Python, and Web Development. Experienced in building desktop and web applications, with practical exposure to building scalable logic and working with structured data. Passionate about creating data-driven systems and interactive dashboards.

WORK EXPERIENCE

Software Developer, *Independent Projects,* 2023 – Present

- Developed multiple desktop and web-based applications using C#, .NET, Python, and web technologies
- Built a custom Reversi–Othello game applying OOP and event-driven programming
- Created a Windows Notepad clone focusing on file handling and clean UI design
- Designed a responsive personal portfolio website using HTML, CSS, and JavaScript
- Worked with Python for basic data visualization and image recognition experiments
- Gained hands-on experience in structured coding, data handling, and application logic

EDUCATION

Bachelor of Computer Applications (Honours) *2023 – 2027*

The Maharaja Sayajirao University of Baroda (**Focused on** Core Programming, Software Engineering, Web Development & Desktop Applications)

KEY SKILLS

Programming Languages:

- C, C++, C#,

Python Areas:

- NumPy, Pandas, Matplotlib, Data Visualization, Image Recognition

Web Technologies:

- HTML, CSS, JavaScript

Frameworks:

- .NET Framework, ASP.NET Web Forms, ADO.NET

Core Concepts:

- OOP, Logic Building, Basic Statistics
